

HTALAL Mohamed Rayan

AI & Software Engineering Student | Software Development • IoT • Innovation

Casablanca, MOROCCO | htalalrayan@gmail.com | +(212)709175045 | [GitHub](#) | [Linkdln](#)

PROFESSIONAL SUMMARY

Engineering student at ENSAM Casablanca driven by curiosity, innovation, and continuous learning. I enjoy collaborating with diverse teams, exploring new technologies, and participating in international programs that foster cultural exchange, leadership, and real-world impact.

EDUCATION

National Higher School of Arts and Crafts (ENSAM Casablanca), Morocco

Engineering Degree in Artificial Intelligence & Software Engineering (Expected 2029)

2024 – Present

- Completed the two-year Integrated Preparatory Cycle (2024–2026).
- Specialized in Artificial Intelligence & Software Engineering (2026–2029).

PROJECTS

MedGuardian – Smart IoT Pill Dispenser

ESP32 • IoT • Embedded Systems • Web Development

[GitHub Repository](#)

- Built a smart medication dispenser with remote monitoring.
- Developed a responsive web dashboard for scheduling and notifications.
- Integrated sensors, OLED display, and automated dispensing.
- **2nd Place – America Innovation Hackathon**

SIR – Smart Intercity Transportation Platform

Next.js • TypeScript • UI/UX Design

[GitHub Repository](#)

- Unified buses, trains, flights, and taxis into one platform.
- Designed the user interface and software architecture.
- Focused on accessibility and route planning.
- **1st Place – UH2C International Summer School 2026**

HT Bank Management System

C • File Handling • Data Structures

[GitHub Repository](#)

- Developed a banking management system with secure authentication and persistent file-based data management.
- Implemented essential banking operations, including account management, deposits, withdrawals, transfers, and loan management.
- Applied structured programming and modular design principles to build a reliable and user-friendly console application.

AWARDS

Award: 1st Place – UH2C International Summer School 2026

Winning Project: SIR – Smart Intercity Transportation Platform

Award: 2nd Place – America Innovation Hackathon

Winning Project: MedGuardian – Smart IoT Pill Dispenser

Award: Third Prize - 11th Social Forum – EHTP Casablanca (2026)

Awarded for outstanding contribution to community development initiatives through Helpers of Hope.

CERTIFICATIONS

- UH2C International Summer School 2026 – Digital Transformation of Society & Ethics
- AMERICA250 Fellowship Program (WECAN) — Certificate of Completion | July 2026
- ESL004 – Advanced English as a Second Language (C1)
- Python Essentials 1 — Cisco Networking Academy
- UH2C Summer School 2025 – Artificial Intelligence & Citizenship

EXPERIENCE

French Call Center Agent

- Developed communication and problem-solving skills in a fast-paced customer service environment.

Active Member — Helpers of Hope

- Contributed to humanitarian projects and collaborated with multidisciplinary teams.

LANGUAGES

- Arabic: Native
- English: Advanced (C1)
- French: Professional Working Proficiency

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript, TypeScript
- **Web Development:** HTML, CSS, React, Next.js, Tailwind CSS
- **Embedded Systems:** ESP32, Arduino, IoT
- **Tools:** Git, GitHub, VS Code
